

Guide to the 1921 Census Digitised Statistics

Describes data for England and Wales

Produced by the Office for National Statistics, the Pattern Recognition and Image Analysis (PRImA) Research Lab, University of Salford, and Nomis, Durham University.

Version 0.2

December 2023

Background of the Project

The ONS has embarked on a program of 'statistical archaeology' projects to make more historical census outputs available to the public in digital form. The coming years will see the digitisation of census outputs from 1921 through to 1961. This data represents digitised versions of tables from the 1921 Census County Reports and Topic Reports. The tables available are the first of several batches of releases. More data will be added as it becomes available.

These data were never published digitally and until now have been available as scanned images of the printed 1921 Census tables. This project aimed to breathe new life into the data by retrieving and processing content from the 1921 Census County and Topic Reports. The digitisation of the data was performed by the University of Salford's Pattern Recognition and Image Analysis (PRImA) Research Lab.

With the data digitised, the ONS plans to make it available to the public and researchers via the Nomis website.

An important note: there is no attempt being made to update or modernise the language or terminology published as part of the program of historical record digitisation. Rather, the information will be presented, both within the datasets and the surrounding meta-data, as printed at the time wherever possible. There may be some instances in which additional information is given to provide clarity.

These tables are presented in a format which has been designed to be the most accessible and usable to a modern audience. As such they may not be in the same format as originally printed and the presentation will differ from the tables seen in the original county and topic reports. A number of the tables are currently available only as a data download file. Where possible, these will be made available in tabular format in later releases.

Quality Assurance of the Data

During processing, errors were identified in the original printed versions. Where possible these have been corrected. As such some of the figures may be different to the original printed versions.

1921 Census Methodology

Basis of enumeration

The 1921 Census was undertaken on Sunday 19th June 1921. The 1921 Census statistics include the living population enumerated at midnight, 19/20th June, 1921. For each area the population is those present on Census night as permanent residents or temporary visitors. Those working or travelling during the night were

included at the place where they arrived on the following day. This includes persons on board vessels in port on Census night or who arrived there on the following day. Fishermen, etc., at sea on Census night who did not arrive in port the following morning are not included in the population.

Census date

This population will never match the permanently resident population, but the Census date of March or April was originally chosen for minimal movement of the population. The 1921 Census was postponed to 19th June from 24th April due to the coal dispute and expectation of a strike of railwaymen and transport workers. This was the latest date before the start of a series of public and industrial holidays that would continue into the Autumn. However, unusually fine weather at this time meant some movement due to holidays, with a higher than usual population in holiday resorts. An estimate of the increase in population due to temporary visitors in the most affected districts was described in the General Tables Appendix A and an image is available in Appendix A of this User Guide.

Enumeration

Similar to previous censuses the country was divided by the local Registrars of Births and Deaths into 38,563 enumeration districts and for each district an Enumerator delivered and collected census schedules. H.M. Customs and Excise officers enumerated persons on board mercantile shipping, fishing vessels, etc.; the Corporation of Trinity House arranged enumeration for persons on lighthouses and lightships; and the police were responsible for enumerating the homeless. For the first time, respondents could fill in an individual form to keep details private from the rest of the household. The Census Office provided census schedules to the Isle of Man and Channel Islands and the census was carried out on the same date by the Island Governments. On the same day a census of overseas armed forces establishments was taken. Due to the Irish War of Independence, the census did not take place in Ireland. Local officers checked schedules and enumeration books and would frequently raise queries with the person making the return.

Questions Asked and Questionnaires

Due to limited space on the Census schedule questions were selected which would best meet present and future user needs, and for the first-time questions which had previously been asked (fertility and infirmity) were not included. The fertility question used in the 1911 Census (length of existing marriages and the number of children born in the marriage) had given long range data which was still of use, while data on infirmities was felt to be unreliable. The age question was changed to ask for age in years and months to increase response accuracy. The question on education was revised to show demand for education facilities, although the postponement of the census until the summer term meant that evening and other special courses were less likely to be running. New questions on dependency and orphanhood helped to prepare the financial framework of the Widows', Orphans' and Old Age Contributory

Pensions Act, 1925. The 1921 Census was the first time that all employees were asked for the name of their employer and their workplace address.

Consistency with Later Censuses

Just as outlined above the 1921 Census included new questions and topics that were not asked about in the previous census, so too have additional questions been asked in the censuses that have been conducted since. The ONS website contains a document¹ outlining all census topics covered from the first census in 1801, through to the 2011 Census. To give a few examples, 1921 did not ask questions related to the number of cars or vans within a household, ethnic group, or religion.

Geography

The data relates to the 1921 County Reports and Topic Reports for England and Wales. The data is available on Nomis down to 1921 district level although not all tables are available at the most detailed level of geography (see Tables section below for area type available for each table). Lower levels of geography will be included in subsequent releases.

1921 local authority and higher digital boundaries are available on the [Open Geography Portal](#).

Districts

For 1921 district names, there are suffixed acronyms which give further detail about the nature of the district. These are detailed below:

Acronym	Label
CB	County Borough
CC	County Corporate (London only)
ME	Metropolitan Borough (London only)
MU	Municipal Borough
RD	Rural District
UD	Urban District

When downloading data from Nomis, where districts in different geographical locations have the same name, the name of the administrative county has been included in brackets after the district name. This is to aid users in being able to correctly identify the district selected.

For some tables the districts included may be limited to Urban or Rural Districts over a certain population size (usually 50,000 or 20,000), along with County Boroughs

¹ <http://www.ons.gov.uk/ons/guide-method/census/1991-and-earlier-censuses/guide-to-earlier-census-data/comparing-census-topics-over-time.pdf>

and Metropolitan Boroughs. A corresponding table with less detailed variable classifications includes Urban and Rural Districts with populations under that size.

Ancient Counties

Some tables in the 1921 reports give data for ancient counties. For dissemination on Nomis, the decision was made to present data at administrative county (with associated county borough where applicable) level only. This allows for more detailed information to be given, and for consistency of geography across tables. The following seven ancient counties are comprised of the following administrative counties, for all other counties, the ancient and administrative versions comprise the same geographical area:

Ancient County	Administrative Counties (with County Borough were applicable)
Cambridgeshire	Cambridge Isle of Ely
Hampshire	Southampton Isle of Wight
Lincolnshire	Lincolnshire (The Parts of Holland) Lincolnshire (The Parts of Kesteven) Lincolnshire (The Parts of Lindsey)
Northamptonshire	Northamptonshire Soke of Peterborough
Suffolk	East Suffolk West Suffolk
Sussex	East Sussex West Sussex
Yorkshire	City of York Yorkshire (East Riding) Yorkshire (North Riding) Yorkshire (West Riding)

Monmouthshire

According to the list of counties included within the regions of England of Wales listed in Table VII of the General Report, Monmouthshire is classed as a Welsh

county. To that end, the data provided for regions includes Monmouthshire within the “Welsh counties”.

However, for the purposes of the 1921 Census outputs, Monmouthshire was generally included within England. In some of the printed tables, figures were given for both “England including Monmouthshire” and “England excluding Monmouthshire”, likewise for Wales. These additional breakdowns are not being included within the digitised data at this time and for the purposes of dissemination on Nomis, Monmouthshire has been included within England only to align with the majority of printed tables. As such, any user aggregated data from regions to country will not match figures given for England and for Wales on Nomis.

Definitions

The following definitions have been taken from the 1921 County Reports. They are for England and Wales.

Private family

“Any person or group of persons included in a separate return as being in separate occupation of any premises or part of premises is treated as a separate family for Census purposes, lodgers being so treated only when returned as boarding separately and not otherwise. Private families comprise all such families with the exception of those enumerated in (i) Institutions or (ii) business establishments or boarding houses in which the number of resident trade assistants or resident boarders exceeds the number of members of the employer's or householder's family (including private domestic servants).”

Rooms

“For the purpose of the Census the rooms enumerated are the usual living rooms, including bedrooms and kitchens but excluding sculleries, landings, lobbies, closets, bathrooms, or any warehouse, office or shop rooms.”

Structurally separate dwellings

“A structurally separate dwelling has been defined for the Census as any room or set of rooms, intended or used for habitation, having separate access either to the street or to a common landing or staircase. Thus, each flat in a block of flats is a separate unit; a private house which has not been structurally subdivided is similarly a single unit whether occupied by one family or by several families. But where a private house has been subdivided into maisonettes or portions, each having its front door opening on to the street or on to a common landing or staircase to which visitors have access, then each such portion is treated as a separate unit.

Where an undivided private house is used partly for business or professional purposes, it is treated as occupied by a private family unless the portion used for non-domestic purposes consists of at least 3 rooms and is more than one quarter of the whole.”

The following definitions were not available in the 1921 County Reports but have been provided. They are for England and Wales.

Inmates

Inmates comprise those persons in an institution for treatment, care, or detention, etc. as appropriate for the class of institution.

Overcrowding

The 1921 definition of overcrowding was where there were more than two persons per room, although it should be noted that the 1921 Census data gives rooms per person and as such can't be used as evidence of 'overcrowding' as defined.

Tables

Tables marked with * are currently available only as a data download file.

County Reports Table 3 - Acreage, population, private families, and dwellings

Description of Table

Shows population by sex and population density, the number of private families and the population therein, and a count of structurally separate dwellings occupied by private families, including the number of rooms occupied and number of rooms per person. This table also includes a population count from 1911 for comparison.

Population

Persons present on census night, persons in private families.

Additional Information

The dwellings shown are those occupied by private families only.

A number of areas are marked with the following footnotes:

* Area altered or created during 1911 - 1921 intercensal period.

† For particulars of alteration, see Table 6.

There are also a number of other footnotes giving information specific to particular areas.

The footnotes specific to areas have not yet been digitised.

Geographical Coverage

England and Wales

The following types of 1921 geography are available on Nomis:

- Administrative county (with county borough where applicable)
- County borough
- County corporate
- Metropolitan boroughs
- Municipal boroughs
- Urban districts
- Rural districts

Ward and civil parish data were also produced in the printed County Reports and will be made available on Nomis in a future release.

Variables

Area in statute acres; Total population; Private Families and dwellings

Classifications

The following variable classifications are available:

Area in statute acres (land and inland water)

Total population – 1911 – Persons

Total population – 1921 – Persons

Total population – 1921 – Males

Total population – 1921 – Females

Total population – 1921 – Persons per acre

Private Families and dwellings – Private families

Private Families and dwellings – Population in Private Families

Private Families and dwellings – Structurally Separate Dwellings occupied

Private Families and dwellings – Rooms occupied

Private Families and dwellings – Rooms per person

County Reports Table 11 - Private families, classified by size of family, rooms occupied, and density of occupation

Description of Table

Shows private families by the size of family and rooms occupied, the population in private families, and the density of occupation, including average number of rooms per person. The table also includes a comparison with 1911 of the percentage of families living within the specified number of rooms.

Population

Persons in private families.

Additional Information

There is a version of the table for administrative counties which has single number of rooms categories for six to 15 or more rooms.

A header note is included with the table:

The following table contains an analysis of the private families within each area according to

- (a) the number of persons in the family, and
- (b) the number of rooms occupied by the family.

Where more than one family is enumerated within a structurally separate dwelling, each is classified according to the rooms it severally occupies and not to the total number of rooms in the dwelling. If, as occasionally happens, one of the rooms is shared by two families (the allotment to each family being say $4\frac{1}{2}$ and $3\frac{1}{2}$ in an 8-roomed dwelling) the families are classified to the next higher integral number of rooms (5 and 4 respectively) but in arriving at the totals (column (m) etc.) the actual figures ($4\frac{1}{2}$ and $3\frac{1}{2}$) have been used."

Geographical Coverage

England and Wales

The following types of 1921 geography are available on Nomis:

- Administrative county (with county borough where applicable)
- County borough
- County corporate
- Metropolitan boroughs
- Municipal boroughs
- Urban districts
- Rural districts

Variables

Number of persons in family; Number of private families occupying the following number of rooms; Total private families; Population in private families; Rooms occupied; Density of occupation

Not included on Nomis, but to be reviewed as part of a subsequent release are the following variables:

Percentage of families living in various units of occupation (1911 Census);
Percentage of families living in various units of occupation (1921 Census).

Classifications

The following variable classifications are available:

Number of persons in family: 1

Number of persons in family: 2
Number of persons in family: 3
Number of persons in family: 4
Number of persons in family: 5
Number of persons in family: 6
Number of persons in family: 7
Number of persons in family: 8
Number of persons in family: 9
Number of persons in family: 10
Number of persons in family: 11
Number of persons in family: 12
Number of persons in family: 13
Number of persons in family: 14
Number of persons in family: 15 and over
Number of persons in family: Total private families
Number of persons in family: Population in private families
Number of persons in family: Rooms occupied

Number of private families occupying the following number of rooms: 1
Number of private families occupying the following number of rooms: 2
Number of private families occupying the following number of rooms: 3
Number of private families occupying the following number of rooms: 4
Number of private families occupying the following number of rooms: 5
Number of private families occupying the following number of rooms: 6-7*
Number of private families occupying the following number of rooms: 8-9*
Number of private families occupying the following number of rooms: 10 and over.*

Density of occupation: Average number of rooms per person
Density of occupation: Population at following densities of occupation (rooms per person): under .3
Density of occupation: Population at following densities of occupation (rooms per person): .3 and under .5
Density of occupation: Population at following densities of occupation (rooms per person): .5 and under .7
Density of occupation: Population at following densities of occupation (rooms per person): under .7 and under 1.0

For administrative counties only:

Number of private families occupying the following number of rooms: 6
Number of private families occupying the following number of rooms: 7
Number of private families occupying the following number of rooms: 8
Number of private families occupying the following number of rooms: 9
Number of private families occupying the following number of rooms: 10
Number of private families occupying the following number of rooms: 11
Number of private families occupying the following number of rooms: 12
Number of private families occupying the following number of rooms: 13

Number of private families occupying the following number of rooms: 14
Number of private families occupying the following number of rooms: 15 and over

County Reports Table 12 - Institutions: Number, total population and inmates

Description of Table

Shows number of institutions and the persons living within them by institution type, sex, and whether an inmate of said institution.

Population

Persons present in institutions on census night.

Additional Information

The original title for this table was "Institutions: Number, total population and inmates of certain classes of institutions and other special premises". For presentation on Nomis the title has been shortened.

The differentiation of total population and inmates applies only to institution classes 1-13 (see [Classifications](#) section for details).

For Workhouses, Separate Poor Law Institutions for Sick, and Other Poor Law Institutions (classes 1-3) the administering board of guardians is disaggregated on the printed tables. However, the data has been aggregated for dissemination on Nomis, giving an overall figure for the district in question. As such, the counts for the individual administering board of guardians are not currently available in the digitised data.

There are a number of footnotes giving information specific to particular areas which have not yet been digitised.

In the printed County Reports, the county level data presented for Table 12 was given for ancient counties. For dissemination of data on Nomis, the decision was made to simplify the county geographies and only present data for all tables for administrative counties (with associated county borough where applicable). Doing so allows continuity of geography across the tables and gives the data at a more granular level than would be available in the ancient counties.

Geographical Coverage

England and Wales

The following types of 1921 geography are available on Nomis:

- Administrative county (with county borough where applicable)
- County borough
- County corporate
- Metropolitan boroughs

- Municipal boroughs
- Urban districts
- Rural districts

Variables

Institutions; Total population; Number of institutions

Classifications

The following institution classifications are available: All categories: Institutions

- 1 Workhouses
- 2 Separate Poor Law Institutions for Sick
- 3 Other Poor Law Institutions
- 4 Homes, etc. for Lunatics, etc.
- 5 Homes, etc. for Cripples
- 6 Homes, etc. for Blind
- 7 Homes, etc. for Deaf and Dumb
- 8 Hospitals (not Naval or Military)
- 9 Convalescent and Nursing Homes
- 10 Prisons
- 11 Reformatory Schools, etc.
- 12 Homes for Inebriates
- 13 Naval or Military Hospitals
- 14 Naval or Military Barracks, etc.
- 15 Ships of the Royal Navy
- 16 Ships other than Royal Navy
- 17 Inland Barges and Boats
- 18 Barns, Sheds, etc. (including Vagrants)

The following variable classifications are available:
Number of Institutions

Total population – Persons

Total population – Males

Total population – Females

Inmates only – Persons

Inmates only – Males

Inmates only – Females

County Reports Table 14 - Ages (five-year age groups) and marital condition [and sex]

Description of Table

Provides a tabulation of five-year age bands by sex and marital status.

Population

Persons present on census night.

Additional Information

The original title for this table was “Ages (quinquennial groups) and marital conditions”. To aid clarity and ensure the title more accurately reflects the content of the table, the title on Nomis was changed.

Until the Age of Marriage Act 1929 a legal marriage could be contracted from the legal age of puberty (14 for males and 12 for females). Persons aged 15 and over were asked for their marital status on the 1921 Census. It is important to note that the census asked for current marital status therefore the data is not a measure of individuals who have ever been widowed or divorced as it cannot capture people who have had multiple marriages.

Geographical Coverage

England and Wales

The following types of 1921 geography are available on Nomis:

- Administrative county (with county borough where applicable)
- County borough
- County corporate
- Metropolitan boroughs
- Municipal boroughs (with population over 50,000 only)
- Urban districts (with population over 50,000 only)

Variables

Age; Sex; Marital condition

Classifications

County Reports Table 16 – Occupations by sex of persons aged 12 years and over

Description of Table

Part i shows the population aged under 12 and aged 12 years and over by sex. The economic activity of those aged 12 years and over by is tabulated by sex.

Part ii shows persons of each sex by orders, sub-orders, groups and codes of the Census 1921 Classification of Occupations.

Population

Persons present on census night.

Geographical Coverage

England and Wales

The following types of 1921 geography are available on Nomis:

- Administrative county (with county borough where applicable)
- County borough
- County corporate
- Metropolitan boroughs
- Municipal boroughs (with population over 20,000 only)
- Urban districts (with population over 20,000 only)
- Rural districts (with population over 20,000 only)

The printed tables within the County Reports include data for the administrative counties without their associated county boroughs. To ensure consistency of geography across tables, and to give users the most detailed data available, these counts are not being made available on Nomis. See Appendix B for a table of county boroughs and their respective administrative county.

Aggregates of Urban Districts within individual administrative Counties excluding County Boroughs and aggregates of rural districts within individual administrative counties were also produced in the printed County Reports.

Variables

Sex; Occupation

Total occupied

Total occupied and unoccupied

County Reports Table 21 – Birthplaces of the Population

Description of Table

Provides a tabulation of country of birth (with British Dominions, Colonies, etc. in more detail) by sex.

Population

Persons present on census night.

Additional Information

The table is marked with the following footnotes:

*Viz., Antrim, Armagh, Down, Fermanagh, Londonderry and Tyrone.

† Viz., Irish Free State.

All counties with the exception of Middlesex, have a category under Asia for Indian Empire. For Middlesex the Indian Empire is broken down into two categories (European) and (Asiatics).

Geographical Coverage

England and Wales

The following types of 1921 geography are available on Nomis:

- Administrative county (with county borough where applicable)
- County borough
- County corporate
- Metropolitan boroughs
- Municipal boroughs (with population over 50,000 only)
- Urban districts (with population over 50,000 only)

Variables

Sex; Country of birth

Classifications

The following country of birth classifications are available:

England

Wales

Scotland

Ireland 6 Northern Counties*

 Remainder of Ireland†

 Part not defined

Isle of Man & Channel Islands

Other British Dominions, Colonies, etc.

Additional Information

The following header notes are provided with the table:

“The population born at sea is included in this table also for convenience.”

“For the number of persons of unknown (in some cases possibly of foreign) birthplace, see Table 21.”

Geographical Coverage

England and Wales

The following types of 1921 geography are available on Nomis:

- Administrative county (with county borough where applicable)
- County borough
- County corporate
- Metropolitan boroughs
- Municipal boroughs (with population over 50,000 only)

County Reports Table 23 - Dependency. Families of living children (including step-children) under 16 years of age - classified by age, sex and marital condition of parent*

Description of Table

Provides a tabulation by five year age band of married and of widowed persons, and the number of living children or step-children aged under 16 that they returned on the census (per thousand persons at each age).

Population

Married or widowed persons

Additional Information

The table is marked with the following footnote:

In this table 0 indicates that the cases were less than 0.5 per 1,000, and - that no case was recorded.

Married women were only included if enumerated with their husbands.

Additional values for married women enumerated with/without their husbands are contained in a small supplementary table.

Geographical Coverage

England and Wales

The following types of 1921 geography are available on Nomis:

- Administrative county (with county borough where applicable)

Variables

Total Number of Married Men (or Widowers) enumerated; Total Number of Married Women (or widows) enumerated with their Husbands; Average Number of Living Children under 16 Years of Age; Age of Married Men/Women enumerated with their Husbands (or Widowers/Widows); Married Women enumerated with their Husbands

Classifications

The following variable classifications are available:

Total Number of Married Men (or Widowers) enumerated

Total Number of Married Women (or Widows) enumerated with their Husbands

The following Average Number of Living Children under 16 Years of Age classifications are available:

No children or no statement

- Married Women enumerated with their Husbands
- Married Women not enumerated with their Husbands

County Reports Table 23L - Dependency. Families of living children (including step-children) under 16 years of age - classified by age, sex and marital condition of parent*

Description of Table

Provides a tabulation by single year of age of married persons, and the number of living children or step-children aged under 16 that they returned on the census (per thousand persons at each age), for the Administrative County of London. Also provides a tabulation of the same information for widowed persons, with five year age bands.

Population

Married or widowed persons

Additional Information

The table is marked with the following footnote:

In this table 0 indicates that the cases were less than 0.5 per 1,000, and - that no case was recorded.

Married women were only included if enumerated with their husbands.

Additional values for married women enumerated with/without their husbands are contained in a small supplementary table.

Geographical Coverage

London

The following types of 1921 geography are available on Nomis:

- Administrative county

Variables

Total Number of Married Men (or Widowers) enumerated; Total Number of Married Women (or widows) enumerated with their Husbands; Average Number of Living Children under 16 Years of Age; Age of Married Men/Women enumerated with their Husbands (or Widowers/Widows); Married Women enumerated with their Husbands

Classifications

The following variable classifications are available:

Total Number of Married Men (or Widowers) enumerated

Total Number of Married Women (or Widows) enumerated with their Husbands

The following Average Number of Living Children under 16 Years of Age classifications are available:

No children or no statement

Total Married Women enumerated
Married Women enumerated with their Husbands
Married Women not enumerated with their Husbands

County Reports Table 24 - Orphanhood of children aged less than 15

Description of Table

Provides a tabulation of orphanhood status by age and sex of children aged under 15 years.

Population

Persons aged under 15 years

Additional Information

Single year age categories were only produced for administrative counties with associated county boroughs.

During processing of the data, it was found that the printed values for the age categories of 0-14 years and for 10-14 years were in error for the administrative county with county borough of Norfolk (H10200109). The correct values for these categories were able to be obtained from the counts for the administrative county of Norfolk (H10200171; not provided in the digitised data, see Geographical Coverage for detail) and the county boroughs of Great Yarmouth (H06201093) and City and County of Norwich (H06201094). However, the data for single year of age in this table was only produced for the higher level of county geography, in this case the administrative county with county borough. It has not been possible to correct the values of single year of age that comprise the 10-14 age category from which the original error was propagated. As such, any user aggregated counts for the 10-14 years and 0-14 years from the single year of age data will not match the presented values for these categories.

Geographical Coverage

England and Wales

The following types of 1921 geography are available on Nomis:

- Administrative county (with county borough where applicable)
- County borough
- County corporate
- Metropolitan boroughs
- Municipal boroughs (with population over 50,000 only)
- Urban districts (with population over 50,000 only)

The printed tables within the County Reports include data for the administrative counties without their associated county boroughs for the 5-year age bands only (not for single year of age). To ensure consistency of geography across tables, and to give users the most detailed data available, these counts are not being made available on Nomis. See Appendix B for a table of county boroughs and their respective administrative county.

County Reports Table 25 – English and Welsh languages at certain groups of ages*

Description of Table

Provides a tabulation of language spoken (English and/or Welsh) by age and sex. Where no statement was returned, the language spoken by the head of family is given.

Population

Persons present on census night.

Additional Information

The following header note is included with the table:

“In some few cases the number of persons speaking English only is abnormally increased by the temporary presence of summer visitors.”

There are a number of other footnotes giving information specific to particular areas.

The footnotes specific to areas have not yet been digitised.

Geographical Coverage

Wales (including Monmouthshire)

The following types of 1921 geography are available on Nomis:

- Administrative county (with county borough where applicable)
- County borough
- Municipal boroughs
- Urban districts
- Rural districts

The printed tables within the County Reports include data for the administrative counties without their associated county boroughs. To ensure consistency of geography across tables, and to give users the most detailed data available, these counts are not being made available on Nomis. See Appendix B for a table of county boroughs and their respective administrative county.

Head of household returned as speaking – Welsh only – Females
Head of household returned as speaking – Both English and Welsh – Males
Head of household returned as speaking – Both English and Welsh – Females

Others not Stated – Males
Others not Stated – Females

Industry Table 3 – Industries: Number of Persons, aged 12 years and over, engaged in each industry, distinguishing the principal occupations by sex and 12 age groups*

Description of Table

Provides a tabulation of industry code by age and sex. Values for each industry are further broken down by the principle occupations within them.

Population

Persons aged 12 and over present on census night engaged in industry

Additional Information

The following header notes is included with the table:

“In some cases the full titles of the occupational groups, as shown on pages 1-4, have been abbreviated; and in the case of certain industries one or more of these titles has been modified from the general form there shown, under which tabulation has been carried out, in order to adapt it to the circumstances of the industry, and to so increase the information afforded. Thus, in the fishing industry "Other Skilled Workers in Textiles" (Code No. 398), are mainly makers and menders of fishing nets, and are so described in this table. Modifications of the latter type are distinguished with an asterisk(*).”

Geographical Coverage

England and Wales

The following types of 1921 geography are available on Nomis:

- England and Wales

Variables

Age; Sex; Industry; Occupation

Codes of the Census 1921 Classification of Industries

The following Occupation classifications are available:
Principle occupations in each Industry (Codes of the Census 1921
Classification of Occupations)Industry

Table 4 – Number of males and females engaged in each industry (condensed list*)*

Description of Table

Part i provides a tabulation by sex of the total population enumerated in each geographical area.

Part ii shows persons in employment by sex and sub-groups of the Census 1921 Industrial Classification, based on their place of work.

Population

Persons present on census night.

Additional Information

Header notes are included with the table:

“The total population enumerated in the several areas distinguished in this table is given in [part i].”

“The local distinctions in [part ii] are based upon place of work, not place of residence.”

The printed table header note goes on to say that:

“The figures for England and Wales apply to persons enumerated therein.”

It should be noted that the figures for England and Wales on Nomis for part ii of the table will be based upon place of work.

The table is marked with the following footnote:

*Owing to circumstances which arose during the process of the tabulation it was found necessary to curtail the work. After consultation with the Ministry of Labour it was decided to omit the information regarding Coal Mines. In this case the industrial classification coincides so closely with the Occupational Classification that the local distribution shown in the Occupation Tables (see County Parts Tables 16 and 17) appeared to meet all practical purposes.

In the printed Industry Tables this table is accompanied by footnotes providing additional values for some individual industry codes. These footnotes have not yet been digitised.

Geographical Coverage

England and Wales

The following types of 1921 geography are available on Nomis:

- Administrative county (with county borough where applicable)
- County Boroughs
- Certain Urban Areas

Variables

Sex; Industry

Classifications

The following sex classifications are available:

Males
Females

The following industry classifications are available:

Sub-groups of the Census 1921 Classification of Industries

Workplace Table 1 – Enumerated populations and populations working within and without each area, distinguishing sex, and net daily movement*

Description of Table

Shows total population enumerated in the area by sex, and occupied persons aged 12 and over (and students aged 18 and over) enumerated in the area by sex and workplace. Also shows persons by sex working in the area but enumerated elsewhere.

Population

Persons present on census night.

Additional Information

A header note is included with the table:

“The words (Within) and (Without) following the name of a district denote that the figures relate to the parts of the district situated respectively within and without the boundary of Greater London.”

Geographical Coverage

England and Wales

The following types of 1921 geography are available on Nomis:

- Administrative county (with county borough where applicable)
- County borough
- County corporate
- Metropolitan boroughs
- Municipal boroughs
- Urban districts
- Rural districts

Variables

Total Population enumerated in the Area; Occupied Persons aged 12 and over (and Students over 18) enumerated in the Area; Occupied Persons aged 12 years and over (and Students over 18) working in the area but enumerated elsewhere in England and Wales; Excess (or Deficiency, -) of Cols. l and m over Cols. n and o

Classifications

The following variable classifications are available:

Total Population enumerated in the Area – Males

Total Population enumerated in the Area – Females

Occupied Persons aged 12 and over (and Students over 18) enumerated in the Area – Total – Males

Occupied Persons aged 12 and over (and Students over 18) enumerated in the Area – Total – Females

Occupied Persons aged 12 and over (and Students over 18) enumerated in the Area – With workplace in the area – Males

Occupied Persons aged 12 and over (and Students over 18) enumerated in the Area – With workplace in the area – Females

Occupied Persons aged 12 and over (and Students over 18) enumerated in the Area – With no fixed workplace – Males

Occupied Persons aged 12 and over (and Students over 18) enumerated in the Area – With no fixed workplace – Females

Occupied Persons aged 12 and over (and Students over 18) enumerated in the Area – Workplace not stated – Males

Occupied Persons aged 12 and over (and Students over 18) enumerated in the Area – Workplace not stated – Females

Occupied Persons aged 12 and over (and Students over 18) enumerated in the Area – With workplace outside the area – Males

Occupied Persons aged 12 and over (and Students over 18) enumerated in the Area – With workplace outside the area – Females

Occupied Persons aged 12 years and over (and Students over 18) working in the area but enumerated elsewhere in England and Wales – Males

Occupied Persons aged 12 years and over (and Students over 18) working in the area but enumerated elsewhere in England and Wales – Females

Excess (or Deficiency, -) of Cols. l and m over Cols. n and o – Persons

Excess (or Deficiency, -) of Cols. l and m over Cols. n and o – Ratio to Total Population %
